EDUCATION

Florida International University (FIU) Expected May 2028

Bachelor of Science in Computer Science |GPA: 3.55

Minor in Artificial Intelligence

Relevant Coursework: Programming I/II, Data Structures/Algorithms, Systems Programming, Artificial Intelligence, Software Engineering

EXPERIENCE

The Education Effect Miami, FL

Software Engineer Assistant *November 2025 - Present*

- Developed internal data tools using **React, TypeScript, and Supabase**, centralizing program, partner, and budget information across 18 schools and supporting oversight of **$10M+ in grant funding.**
- Automated administrative tracking and reporting workflows, replacing manual processes to improve data consistency and reduce operational overhead across school and partner teams.
- Designed and implemented **PostgreSQL database schemas** and queries to support budget management, service tracking, and program reporting across internal applications.

Atlas Esports Consulting Remote

Software Engineer Intern *March 2025 - October 2025*

- Developed responsive esports platform features using **React, Node.js, and Firebase**, translating product requirements into reusable components and streamlined player workflows.
- Integrated player statistics and performance analytics using **REST APIs** and client-side caching to reduce redundant requests and improve data retrieval.
- Built **Flask API** endpoints for live match data and player insights; tested integrations and collaborated remotely through **Git/GitHub** workflows.

PROJECTS

Community School 'Home'| *Next.js, React, TypeScript, Supabase*

- Built a full-stack dashboard for school events, service requests, and budget tracking, supporting programs associated with $10M+ in federal grant funding.
- Implemented multi-day request workflows with **React Hook Form and Zod**, reducing processing turnaround time by 4 weeks.
- Added role-based access controls, responsive layouts, and **automated tests using Vitest and React Testing Library** to improve reliability and maintainability.

Deadlock AI Improver | *Python, FastAPI, React, OpenAI API, PostgreSQL*

- Developed an **AI-assisted gameplay analytics platform** that transforms match and player statistics into personalized coaching recommendations and measurable improvement goals.
- Designed **FastAPI** services and a React dashboard for match-history analysis, trend visualization, and **structured AI-generated feedback.**
- Implemented data validation, modular analysis pipelines, and automated tests to improve recommendation consistency and reliability.

Cardfolio – Pokémon Buyer App | *React Native, TypeScript, Expo, REST APIs*

- Developed a mobile-first Pokémon card pricing and collection app using React Native, TypeScript, Expo Camera, and external APIs.
- Integrated **live pricing with API caching** and fallback data to improve reliability when external services were unavailable.
- Built **camera, image-picker, persistent-state, and trade-calculation** workflows with unit-tested pricing logic and configurable deal thresholds.

TECHNICAL SKILLS

Languages: Python, Java, JavaScript, TypeScript, HTML/CSS, SQL, C++, C, Go

Frameworks/Libraries: React, Next.js, Node.js, Flask, FastAPI, Tailwind CSS, Angular

Developer Tools: Git, GitHub, VS Code, IntelliJ, Firebase, Supabase, PostgreSQL, REST APIs, Powershell

AI: Github Copilot, Codex, Claude, Cursor,

Certifications: Adobe Certified

Additional: Bilingual: English, Spanish
